***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Claims 1, 4, 8, 10, 12, and 14 are allowable because the instant application is directed to a nonobvious improvement over the invention described in Patent No.: US 6,424,328 (Ino et al.) and 6,075,505 (Shiba et al.). The improvement comprises *a connection switching circuit connects, by time division, each of the output terminals of the video signal line driving circuit to the video signal lines within the corresponding video signal line group from the time when one scanning signal line is selected by the scanning signal line driving circuit and until another scanning signal line is selected; wherein each of the plurality of video signal line groups is made of a plurality of video signal lines that are spaced apart by an odd number of video signal lines so that first and second video signal lines of a given group are spaced apart from one another by at least one video signal line of a different group; wherein the connection switching circuit changes a switching order of the video signal lines to be connected to each of the output terminals of the video signal line driving circuit on accordance with a switching of the scanning signal line selected by the scanning signal line driving circuit.* This patentable distinction is included in independent claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer T. Nguyen whose telephone number is 571-272-7696. The examiner can normally be reached on Mon-Fri: 9:00am-5:30pm.
